Please explain your response.

Comments
Providing help to understand the topics that were confusing from class
Discussions were mostly just sessions where we worked through the problem sets and exam problems
A good and responsible TA
Everything is perfect!!!
I appreciate the effort of TA but I feel the time is not enough for the practice session.
Seungyoo is a good TA because he explains us in a friendly way how to understand the theory and problems. He enjoys teaching and that become him in a great TA.
His lecture is clear and well-organized, and he always explains things well
The TA did his best, he was very patient, approachable, friendly and possessed a strong command of the subject matter.
He can teach us very well.
He explained the PSET problems well, but sometimes it would have been a bit more helpful to spend more time on certain problems instead of covering more problems in general.
The content summary is complete, the lecture is detailed, and the place that you don't understand will be emailed back
Very detailed and oriented TA with lots of patience. Willing to help and reply to emails on time.
The TA sessions were very helpful. Moreover, the TA was prompt in responding to queries via mail in a detailed format. Thank you!
Seungyoo is an exceptional teaching fellow. He is clearly passionate about teaching and regularly spent extra time to ensure that he shared the theoretical and practical approaches to the problem sets and their related concepts. I really enjoyed the way he teaches has been extremely useful towards my personal understanding. He has also been accessible outside of class for any extra help.
Teaching assistant class is really helpful for the test
the explanation was clear, really helpfull understanding and solving the problem sets
None
He is a good TA! Always helpful, Seungyoo well explains material. Thank you!
Something is difficult to understand in the class, so I need to learn by myself back home.
his sessions make the course easier. however, the time of his sessions are not enough.

TOO MUCH OR TOO LITTLE	10.00%

What were the most valuable aspects of the course?

Comments
Mr. Shin explains problem sets very well, he gives a lot of his time to cover all questions, and he delivers ideas very well.
Examples were neatly worked and thoroughly explained.
The assistant teacher is always very careful and conscientious, and he will patiently repeat the explanation when he encounters something that the students don't know!
I would appreciate if the TA would have specific office hour an space because I think the course content is challenging.
– Organize – Fantastic knowledge of the course–topics – Friendly explanation – Join the theory part with the real situations – Encourage to participate
As a great complement of the class. I learned how to deal with problems and exams
Loved attending his sessions, helped us a lot in understanding the analysis questions and provided us with as much help as possible.
The discussion is very useful.
Going over key problems for exams.
Review of exam content
TA discussion section is very valuable. It's a very good review or preview of the professor's lectures.
Seungyoo's teaching!!!!!!
Practical skill to solve theoretical and empirical problems
problem set discussion
None
Way of teaching, class communication, office hours and readiness to help.
Maybe Stata and the problem sets.
he is extremely helpful even through emails but it would be better if he also have official office hours

Additional Feedback

If you have additional comments about this course, please provide them below.

Comments
The solutions provided in the blackboard could be more elaborated. They are so shortcut that hard to understand.
I would have liked he has office hours.
Really informative TF sessions
Seungyoo is an excellent TA. He explains each question thoroughly, making sure that every student understands the topic clearly. However, the only issue is that he doesn't have enough time to cover some of the more complex topics in the review discussion sessions. I wish he had more time to go over these topics again.
No since he is very great!
The problem sets are tough and take time to be done, thus, office hours could help even more.
Thank you, Seungyoo!

Student learning

What skills or knowledge did you learn or improve in this course?

Comments
Problem solving techniques
Statistical data capacity and data analysis capacity.
Improved – logic in statistics – understand better the theory – encourage me to learn more
Stata
The calculation of statistics.
Statistical skills regarding expectation and moments
stata
I learned a good deal of statistical methods and how to apply them to very specific problems.
practical skills
probability, univariate model, multiple random variables, expectation, point and interval estimation, hypothesis testing, regression
None
Very basic elements of Stata. Some very basic refreshment of my previously learned knowledge.
writing fast

For Students

What advice would you give to students considering taking this course in the future?

Comments
Take pictures since the solutions offered in this course are much more detailed than those offered in the solution sets.
study and solve problems before the TA class because the time is short
Attend all his sessions, ask him your doubts right on the spot, and ask him alternative easy ways to solve a particular problem.
If you have any questions, just tell to him!
Come to every class
Pay attention to Seungyoo – he is an excellent teaching fellow and will give you the necessary guidance to get through the course.
Taking good and complete notes on class will be helpful for the test
must take
None
Excellent TA!
utilize him, he is so helpful
